**RE: Water Service Inquiry**  
Boston Golf Subdivision – 101 Gardner St, Hingham

Dear Ms. Walker:

In response to your inquiry, we have determined that the property in question can supply sufficient potable water for a new three (3) home subdivision. This project will require a water main extension and fire hydrant on the newly constructed roadway. All costs associated with the design, permitting, plan review, inspection and construction of this extension and subsequent water services are the responsibility of the property owner/developer.

Final approval of this project is contingent upon fulfillment of all Weir River Water System requirements as outlined in the Rules and Regulations, which includes, but is not limited to, completed water service and water balance program applications for each home, required town permits, and a final inspection by our department.

Please accept this letter as notification that the WRWS has the capacity to service all three properties. Should you have any questions or require any additional information, please feel free to contact me at 781-804-2304 or [tierneyr@hingham-ma.gov](mailto:tierneyr@hingham-ma.gov).

Warmest Regards,

A handwritten signature in blue ink, appearing to read "Russell E. Tierney", is written over a blue horizontal line.
