Subject: RE: 5 Woodbine Lane

Michael,

As requested, here is a description of the ledge and tree removal that will occur at 5 Woodbine Lane:

Existing trees that reside in the footprint of the proposed dwelling and patio will be removed. The existing backyard contains large areas of overgrowth and trees which are proposed to be removed as part of the regrading and septic instillation. The backyard will then be reseeded, which will provide better lawn conditions than what currently exists on the lot. Existing trees in the front yard lying within the delineated disturbance area will be removed as well.

We have mainly found that the rock cropping's onsite are actual rocks/boulders, not ledge, so there should be minimal "ledge" removal, if it is encountered it will either be chipped or blasted.

While there hasn't been a Landscape Architect hired as part of this project at this point, the site will have typical landscape beds, shrubs and trees within the site.

Please let us know if you have any additional questions

Thanks,

Brendan P. Sullivan, P.E., P.L.S. | Director of
Engineering and Land Survey
